Bachelor of Business Administration (BBA)

The BBA program is a dynamic undergraduate course that equips students with essential business management knowledge and leadership skills. The curriculum focuses on core areas such as marketing, finance, human resources, operations, and entrepreneurship, fostering a strong foundation for the corporate world.

Course Outcomes:

- Develop managerial and leadership abilities to excel in business environments.
- Master critical business areas like marketing, finance, and human resources.
- Build problem-solving and decision-making skills for real-world challenges.
- Gain exposure to business ethics, global trade, and corporate strategies

Career Opportunities:

- Management Roles: Business Manager, Operations Executive, HR Manager.
- Marketing & Sales: Marketing Executive, Sales Manager, Brand Strategist.
- Entrepreneurship: Launch and manage your own business ventures.
- Corporate Sector: Financial Analyst, Business Consultant, Project Coordinator.
- Higher Studies: Pursue MBA, PGDM, or certifications.

Bachelor of Computer Applications (BCA)

The BCA program is a specialized undergraduate course designed to provide in-depth knowledge of computer applications, programming, and IT systems. It prepares students for a career in technology and software development through a blend of theoretical concepts and practical skills in coding, data management, and systems analysis.

Course Outcomes:

- Acquire programming skills in languages like Python, C++, and more.
- Develop expertise in database management and software engineering.
- Understand concepts of networking, cloud computing, and cybersecurity.
- Build problem-solving abilities and innovate in IT-driven solutions.

Career Opportunities:

- Software Development: Software Engineer
- IT Services: System Administrator, IT Support Specialist, Network Engineer.
- Data & Analytics: Data Analyst, Database Administrator, Business Analyst.
- Emerging Tech: AI/ML Specialist, Cybersecurity Analyst, Cloud Architect.
- Higher Studies: Pursue MCA, M.Sc. in Computer Science, or certifications.

Bachelor of Science (B.Sc.)

The B.Sc. program is a versatile undergraduate degree that provides students with a strong foundation in scientific principles and their practical applications. Offered in various specializations such as Physics, Chemistry, Biology, Mathematics, Computer Science, and more, the course focuses on developing analytical and research skills.

Course Outcomes:

- Gain in-depth knowledge of scientific concepts and methodologies.
- Build critical thinking and problem-solving skills for scientific research.
- Acquire hands-on experience through laboratory work and experiments.
- Develop a solid foundation for advanced studies in specialized fields.

Career Opportunities:

- Research & Development: Research Scientist, Lab Technician, Field Researcher.
- Education: Science Educator, Academic Trainer.
- Healthcare & Environment: Clinical Research Associate, Environmental Analyst.
- IT & Data Science: Data Scientist, IT Specialist (for B.Sc. Computer Science).
- Higher Studies: Pursue M.Sc., Ph.D.,

Bachelor of Commerce (B.Com)

The B.Com program is a comprehensive undergraduate course designed to provide students with foundational knowledge in business, finance, accounting, economics, and management. The curriculum combines theoretical concepts with practical skills to prepare students for the dynamic world of commerce and industry.

Course Outcomes:

- Gain expertise in accounting, taxation, and financial management.
- Develop analytical and decision-making skills for business challenges.
- Understand global trade practices, business law, and entrepreneurship.
- Proficiency in business communication and organizational behavior.

Career Opportunities:

- Accounting & Finance: Accountant, Financial Analyst, Tax Consultant.
- Banking & Insurance: Banking Officer, Loan Officer, Insurance Advisor.
